# Dial Indicato

### SERIES 1 — Compact One Revolution Type for Error-free Reading

- The one revolution dial indicator (compact type) prevents the possibility of reading errors.
- Mitutoyo's unique shock-proof mechanism is incorporated, providing improved resistance to shock due to sudden spindle retraction caused by impact.
- The indicator is highly durable thanks to its oil- and watertight design, quenched hardened stainless-steel, carbide contact point, and a grand gear made of wear- and deformation-resistant material.
- Application of an anti-reflective and hard surface coating improves scale visibility along with scratch and chemical resistance.
- The red dead zone in the middle of the dial face is separated from the bezel and doesn't cover the graduations. Therefore, users can always see the range where accuracy is not guaranteed even if the bezel is rotated.

## One revolution type Back Plunger dial gages are also available. (Refer to pages 07-59 to 07-62 for details.)

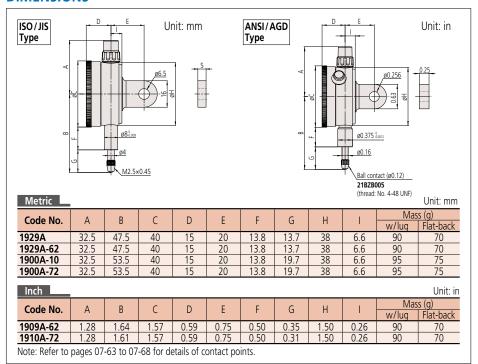

#### **SPECIFICATIONS**

	Metric ISO/JIS type ANSI/AGD type											
	Code No.			D	Maximum permissible error (MPE) (μm)							
			Graduation (mm)	(range/rev)	Indication error					Repeat-	Dial	Measuring
